---

## PROFESSIONAL SUMMARY

Engineering Manager with **11+ years of experience** across Logistics, Digital Procurement, Retail, and Supply Chain domains. Proven track record of **leading backend engineering teams**, owning end-to-end delivery, and designing **scalable, cloud-native platforms**. Strong blend of **people leadership and hands-on technical depth** in Java, Microservices, Kubernetes, and Cloud platforms. Passionate about building high-performing teams and delivering systems that create measurable business impact.

---

## LEADERSHIP & MANAGEMENT EXPERIENCE

- Engineering Manager for ESG and Supplier platforms at enterprise scale
  - Leading sprint planning, delivery execution, and release management
  - Mentoring engineers, conducting performance reviews, and supporting career growth
  - Driving hiring, onboarding, and team scaling initiatives
  - Owning technical design reviews and architecture decisions
  - Partnering with Product, Business, and Stakeholders on roadmap planning
- 

## PROFESSIONAL EXPERIENCE

### Engineering Manager

**A.P. Moller – Maersk | Bengaluru, India**

*May 2025 – Present* - Lead backend engineering team delivering **ESG compliance** and **Supplier Hub** platforms - Own end-to-end delivery: planning, execution, release, and production stability - Drive system design, architecture reviews, and platform scalability decisions - Introduced AI-driven solutions to improve efficiency and decision-making - Collaborate closely with Product, Data, and Business teams to align technology with outcomes

**Tech:** Java, Spring Boot, Microservices, Kubernetes (AKS), Azure, PostgreSQL, GitHub Actions

---

## Senior Software Development Engineer / Technical Lead

### A.P. Moller – Maersk | Bengaluru, India

*Sep 2022 – May 2025* - Key contributor to backend team setup and initial hiring - Designed and developed core APIs for Digital Procurement Platform - Led CI/CD pipeline setup using GitHub Actions - Mentored engineers and enforced code quality standards - Actively participated in architecture and platform standardization discussions

---

## Technical Lead

### Manhattan Associates | Bengaluru, India

*Sep 2018 – Sep 2022* - Led backend development for Retail and Supply Chain platforms - Owned feature delivery across multiple microservices - Collaborated with cross-functional teams for large-scale releases - Mentored team members and drove engineering best practices

---

## Software Engineer

### Tesco Bengaluru | Bengaluru, India

*Jul 2014 – Sep 2018* - Developed and maintained backend services for Product Range and Store Fulfillment systems - Worked in Agile teams delivering APIs consumed by multiple platforms - Contributed to Tesco's first NoSQL (Couchbase) implementation

---

## TECHNICAL SKILLS

**Leadership:** Engineering Management, Technical Leadership, Mentoring, Hiring

**Backend:** Java, Spring Boot, Spring Cloud, Reactive Systems, REST APIs

**Architecture:** Microservices, Distributed Systems, Multi-tenancy

**Cloud & DevOps:** Kubernetes, Docker, Azure, GCP, AWS, GitHub Actions, CI/CD

**Databases:** PostgreSQL, MySQL, MS SQL, Couchbase

**Practices:** Agile, TDD, Code Reviews, System Design

---

## KEY PROJECTS

**Supplier ESG Platform** – Led backend design and delivery of ESG compliance platform managing supplier risk and regulatory adherence.

**Product Pipeline Management (PPM)** – Backend lead for procurement planning platform improving financial reporting and supplier negotiations.

**OMNI POS & Store Inventory Fulfillment** – Contributed to cloud-enabled POS system supporting BOPIS and offline-first operations.

---

## EDUCATION

### **Bachelor of Engineering (Information Science)**

BV Bhoomaraddi College of Engineering, Hubballi | 2014

### **Diploma – Information Science**

KLE Polytechnic, Hubballi | 2011

---

## ACHIEVEMENTS

- Champ of the Month (Sept 2024) – ESG Product Leadership
  - Star Award & Promotion for technical and leadership contributions
  - Published paper at IEEE Xplore (CICN 2013)
- 

*Available for Engineering Manager / Technical Manager opportunities*
